FOREST RESOURCE DEVELOPMENT AGREEMENT
ENTENTE SUR LA MISE EN VALEUR DES RESSOURCES FORESTIERES

Directory of Secondary Wood-Using Industries in Alberta–1986

Canada

Alberta

87-04106/

The Canada-Alberta Forest Resource Development Agreement is a subsidiary agreement of the Canada-Alberta Economic and Regional Development Agreement, which provides coordination and cooperation between the governments of Alberta and Canada in areas of Alberta's economic development.

The Canada-Alberta Forest Resource Development Agreement is funded equally by the governments of Canada and Alberta, from April 1, 1984, to March 31, 1989.

Its primary objectives are to ensure the long-term availability of timber supplies; to optimize timber uses; and to contribute to the growth and diversification of Alberta's economy.

The Agreement comprises three programs: Reforestation; Applied research, technology transfer and opportunity identification; and Public information, evaluation and administration. These programs are managed by a joint Directorate and are implemented by the Canadian Forestry Service and the Alberta Forest Service.

For more information, please call or write:

L'Entente Canada-Alberta sur la mise en valeur des ressources forestières est auxiliaire à l'Entente Canada-Alberta sur le développement économique et régional, qui vise à assurer la coordination et la coopération des deux gouvernements relativement au développement économique de l'Alberta.

L'Entente Canada-Alberta sur la mise en valeur des ressources forestières est financée à parts égales par les gouvernements du Canada et de l'Alberta, et a cours du 1er avril 1984 au 31 mars 1989.

Ses objectifs principaux sont assurer la disponibilité à long terme de réserves de bois; optimiser leur utilisation; et contribuer à la croissance et la diversification de l'économie de la province.

L'Entente comprend trois programmes: Reboisement; Recherche appliquée, transferts de connaissances techniques et relevé des occasions; et Information, évaluation et administration. Ces programmes sont gérés par un Bureau de direction conjoint, et mis en oeuvre par le Service canadien des forêts et le Service forestier de l'Alberta.

DIRECTORY OF SECONDARY WOOD-USING INDUSTRIES IN ALBERTA–1986

March 1987

DISCLAIMER

The study on which this report is based was funded under the Canada-Alberta Forest Resource Development Agreement.

The views, conclusions, and recommendations are those of the authors. The exclusion of certain manufactured products does not necessarily imply disapproval nor does the mention of other products necessarily imply endorsement by the Canadian Forestry Service or the Alberta Forest Service.

Acknowledgments

1. The co-chairpersons of this project wish to thank the following committee members for their contributions to this report.

   Richard Anderson, Alberta Dept. of Forestry
   Diana Boylen, Canadian Forestry Service
   Doug Caston, Federal Dept. of Regional Industrial Expansion
   Tom Dioszeghy, Alberta Public Works, Supply and Services
   Mickey Holland, Architectual Society of Alberta
   Joachim Loh, Jasper Mill Works
   Neil Miller, Alberta Dept. of Forestry
   Horst Ramanauskas, Sunchild Forest Products
   Ted Szabo, Alberta Dept. of Forestry

2. We also wish to thank Alberta Economic Development and Trade's computer services for access to their data bank and the production of the body of this directory. In particular we wish to acknowledge Mr. Richard Snyder for his efforts on our behalf. This publication would not have been possible without the above people donating their valuable time.

   Pat Sloan
   Michael Heit
   Co-chairmen of Secondary Wood-using Industries Directory
   Task Force

   March 1987

OVERVIEW

1. This directory is the result of a resolution of The Hardwood Utilization Conference held in Whitecourt in 1985. The Canada-Alberta Forest Resource Development Agreement asked Pat Sloan and Michael Heit to co-chair a committee to develop a directory of secondary wood-using industries. Pat Sloan convened a committee to state what the purpose of the directory should be and what should be in the directory. (see acknowledgements for committee members). The purpose of the directory is to bring buyers and sellers together, to be used as a data source for identifying markets for Alberta primary wood products, and to assist buyers to purchase locally manufactured products.

2. The term "secondary forest products" is an elusive term to all but the technically minded. The committee's advice was that it is better to err on the side of *including* a firm that may not technically be defined as a secondary wood-using industry than err on the side of *excluding* a given business. For example, a company that manufactures signs is included in this directory where in fact the company may be using mostly plastic as its material and only a little wood, or in some cases, no wood.

3. The data were collected by Alberta's Economic Development System's Group under R. Snyder. This survey of manufacturing was done in 1983 and updated in 1986. The data are essentially a subset of a publication produced by the Alberta Economics Development and Trade—titled *Alberta Manufacturing Index*, 1987. Mr. R. Snyder was kind enough to give us access to this information and conduct a special commuter run for the committee.

4. This publication is sponsored by the Canada-Alberta Forest Resource Development Agreement. This agreement was signed on October 26, 1984 by the Governments of Canada and Alberta. The $23 million cost of the five-year agreement is shared by the two governments.

5. The Canada-Alberta Forest Resource Development Agreement has also published a Directory of Primary Wood-using Industries. It is available from the Canadian Forestry Service and the Alberta Forest Service.

6. Although many people think of Alberta as a"prairie" province, the fact remains that 60% of Alberta's land area is forest covered. Most of northern Alberta is endowed with a boreal mixed-wood forest in which white spruce and two poplar species (aspen and balsam poplar) predominate. Extensive stands of jack pine exist in the northeast. Lodgepole pine and black and white spruce dominate the foothills from the U.S. border to Grande Prairie. This subalpine forest accounts for over half of Alberta's timber production.

   Alberta's primary forest industry consists of two dozen major sawmills producing 1.1 billion board feet of lumber and another 300 small sawmills that produce less than 100 million board feet in total. There are two major bleached kraft pulp mills, three plywood mills, and three oriented strand board mills (two new ones and one reconverted waferboard mill). There are 18 wood treatment plants and one MDF plant.

7. The Ministry of Economic Development commissioned Hallmark Engineering in 1983, to assess the current status of secondary manufacturing of solid wood products in Alberta. It was found that the secondary manufacturing sector was substantially greater than had been expected. It provides an estimated direct employment to 5500 people and an annual sales volume of $400 million. One unfortunate finding was that the major part of the raw materials used by Alberta wood-using industries is not based on the Alberta forest resource but is imported from other provinces, the U.S.A. and overseas. This is changing with the introduction of a medium density fibreboard (MDF) plant and availability of specialty goods and dimensions. A number of recent studies under the Canada-Alberta Agreement have identified local opportunities and have explored import substitution. From an employment and economic diversification perspective, secondary wood-using industries in Alberta hold a lot of promise.

HOW TO USE THE DIRECTORY

Section I. Consists of a listing of firms in alphabetical order. Included in this section are the name, address, telephone number, an indication of the staff size (it is given as a range) and product lines. This is similar to the white pages of a telephone book.

Section II. Arranges the information in terms of products. It gives an alphabetic listing of products and the firms that produce these products. If a company produces more than one product, it is listed more than once. This is similar to the yellow pages of a telephone book.

How to be listed

All wood-using and related firms surveyed for the Alberta Economic Development and Trade publication, *Alberta Manufacturing Index*, are listed in this report.

If your firm is not listed you may be missing potential business opportunities. To ensure you are included in the Alberta government's data bank, please contact Alberta Economic Development and Trade's System Group in Edmonton.
